

AIR SEA LAND GROUP

THE DYNAMIC ARMOUR COMPANY ASLGRP.COM

ARC - ATTACK RESISTANT COMPOSITE

Widely used in the Police force and security sectors

- ▶ VEHICLE PROTECTION
- ▶ ATM FASCIA

What is ARC? ARC is a structural composite designed to absorb impact from projectiles ASL's ARC has been designed by our specialist team to suit a variety of different applications.

ARC is manufactured from a high-strength woven yarn, highly consolidated with a fire-retardant resin system.

ARC is designed to protect both the occupants and the exterior of the vehicle in a riot or hostile situation.

All mouldings are produced in a smooth gel coat finish providing "like for like" vehicle detailing.

Panels are on average 5mm thick and structurally bonded to the vehicle.

FEATURES

- ▶ Class A fire retardant, ideal protection from petrol bombs
- ▶ Shotgun resistant
- ▶ Lightweight (6kg per m²)
- ▶ Can be manufactured colour specific to the customer's requirements
