

AIR SEA LAND GROUP

# ANTI-CUT PANELS

ASL Anti-Cut is designed to keep your valuables safe.

- ▶ VEHICLE PROTECTION
- ▶ BUILDING PROTECTION
- ▶ ATM PROTECTION

The Air Sea Land Group have designed and manufactured specialist Anti-Cut panels to protect both vehicles and compounds from physical attack.

ASL Anti-Cut panels are ideal for use in Cash in Transit (CIT) vehicles and ATM protection, as panels are lightweight and modular for ease of installation.

Anti-Cut panels are designed using a mix of ASL's composite and ceramic armour systems.

The panels can be manufactured bespoke to suit a number of vehicle platforms or room sizes and offer resistance from 14" petrol disc cutters, angle grinders and other easily accessible, abrasive cutting tools.

ASL Anti-Cut panels can provide 10min/20min or 40 minutes Anti-Cut protection against a 400mm square entry point.

## ANTI-CUT FEATURES

- ▶ Panel thickness approx. 50mm
- ▶ Weight approx. 35kg/m<sup>2</sup>
- ▶ Competitive solution
- ▶ Fantastic protection time
- ▶ Maximum size 2850 x 1350mm
