FOLDING BLAST CONTAINER

A collapsable blast containment vessel - easy assembly, easy storage

- ▶ FRAGMENT PROTECTION
- ▶ FRONT-LINE SERVICES
- ▶ PORTABLE PROTECTION
- ▶ EVENT VENUES

a vehicle, ideal for Police, fire or security fleets.

Fold points are stitched in red. Quick pressure should be applied to the centre ring diagonals, which naturally makes the container twist.

Repeat the process until all three ring sections have collapsed. Apply pressure to the top of the folded container to compress further.

The folding blast container is a light-weight, easy to assemble, and store, containment vessel.

The blast container will contain a suspect explosive device while awaiting the arrival of a bomb disposal team.

Designed to withstand blast and fragments from an explosive device containing up to 200g of PE4.

When folded into its storage position, the container will fit in the spare tyre compartment of

SPECIFICATIONS

- ▶ 200g PE4
- ▶ Height assembled: 900mm
- ▶ Outer ø folded: 530mm
- ▶ Outer ø assembled: 530mm
- ▶ Weight: 11kg
