

AIR SEA LAND GROUP

ARC - ATTACK RESISTANT COMPOSITE

Widely used in the Police force and security sectors

▶ VEHICLE PROTECTION

What is ARC? ARC is a structural composite designed to absorb impact from projectiles.

The product has been designed to suit a variety of different applications and is widely used in the Police and security sectors, to protect both the occupants and the exterior of the vehicle in a riot or hostile situation.

ARC is manufactured from a high strength woven yarn, highly consolidated with a fire-retardant resin system.

All mouldings are produced in a smooth gel coat finish providing like for like vehicle detailing.

Panels are on average 5mm thick and structurally bonded to the exterior of a vehicle to provide a protective outer skin.

FEATURES

- ▶ Class A fire retardant, ideal protection from petrol bombs
- ▶ Shotgun resistant
- ▶ Lightweight (6kg per m²)
- ▶ Can be manufactured colour specific to the customer's requirements
