

ANTI-CUT PANELS

ASL GRP have designed and manufactured specialist Anti-Cut panels to protect both vehicles and compounds from physical attack.

ASL Anti-Cut panels are ideal for use in Cash in Transit (CIT) vehicles and ATM protection, as panels are lightweight and modular for ease of installation.

Anti-Cut panels are designed using a mix of ASL GRP's composite and ceramic armour systems.

The panels can be manufactured bespoke to suit a number of vehicle platforms or room sizes and offer resistance from 14" petrol disc cutters,

angle grinders and other easily accessible, abrasive cutting tools.

ASL Anti-Cut panels can provide 10min/20min or 40 minutes Anti-Cut protection against a 400mm square entry point, dependent on panel thickness

ANTI-CUT FEATURES

- ▶ PANEL THICKNESS APPROX. 50MM
- ▶ WEIGHT APPROX. 35KG/M²
- ▶ COMPETITIVE SOLUTION
- ▶ UP TO 40MINS PROTECTION TIME
- ▶ MAXIMUM SIZE 2850 X 1350MM
- ▶ ABRASION & CHEMICAL RESISTANT
- ▶ DESIGNED TO SIT INTERNALLY
- ▶ DISCREET PROTECTION SYSTEM
