

FEATURES

- ▶ Multi-hit protection
- ▶ Fire retardant
- ▶ Low cost
- ▶ Can be worked with on site
- ▶ Ballistic certification provided

ASSET PROTECTION

PROPERTY PROTECTION

LEGION GREEN ARMOUR

The ASL GRP Legion Green Armour panels are manufactured from a fibre reinforced woven material, providing protection from shell fragments, blast bullets and other projectiles.

Uniform protection is provided by the entire panel, which can be supplied in a variety of thickness to meet different levels of threat.

Panels can be adapted by ASL GRP to offer protection for high risk premises, such as banks and Post Offices handling cash,

as well as for vehicles, marine craft and aircraft.

Panels can be cut to size on site using standard equipment, so installation is quick and cost-effective. More complex shapes

can be machine-cut prior to delivery. Panels can be fitted directly onto traditional timber studwork and wallpaper can be applied directly to the surface for a good finish.
